PROFESSIONAL SUMMARY

Chief Technology Officer (CTO) and Senior Full Stack Engineer specializing in designing and delivering scalable software solutions for web, mobile, and cloud platforms. Experienced in leading engineering teams, architecting enterprise systems, and building complete digital products from concept to production. Strong expertise in NestJS, Node.js, TypeScript, React, React Native, PostgreSQL, MongoDB, Docker, Linux, DevOps, and AI integrations. Passionate about creating secure, scalable, and high-performance systems while aligning technology with business growth and innovation.

PROFESSIONAL EXPERIENCE

Chief Technology Officer (CTO)

Larthaa Lab

2025 – Present

- Lead the company's technology vision, engineering strategy, and software architecture.
- Manage and mentor a team of 4 software engineers across multiple products.
- Lead the development lifecycle of 5 commercial software platforms.
- Architect enterprise SaaS products including MEL.IQ, a modern e-commerce platform inspired by enterprise online store builders.
- Designed and developed secure cloud infrastructure for encrypted media management within Majlis.
- Lead the development of core platforms including Mel.iq, Majlis, and Worshtech.
- Establish engineering standards, CI/CD workflows, and software development best practices.
- Conduct technical workshops and mentor junior developers.
- Serve as a Board Member, contributing to technology strategy, business planning, and product innovation.

Founder & Owner

Alworya

2025 – Present

- Founded and led the development of Alworya, a full-scale SaaS platform for booking wedding halls and chalets.
- Architected and developed the backend using NestJS, Prisma, and PostgreSQL with a scalable multi-tenant architecture.
- Built RESTful APIs with JWT authentication, OTP login, and role-based access control.
- Developed cross-platform mobile applications using React Native (Expo) for Android and iOS.
- Designed and implemented owner and administration dashboards using React.
- Integrated real-time chat between customers and venue owners.
- Implemented booking management, calendar scheduling, notifications, favorites, maps, search, and venue management features.
- Developed CRM, staff management, subscriptions, reporting, and analytics modules.
- Managed product planning, software architecture, deployment, and overall technical leadership.

Jarah – AI-Powered Consulting Platform

2025 – Present

- Founded and developed Jarah, a digital consulting platform connecting users with verified experts across multiple fields.
- Designed and implemented the complete platform architecture and backend infrastructure using NestJS.
- Developed cross-platform mobile applications for users and experts using React Native (Expo).
- Built a responsive administration dashboard using React.
- Implemented secure authentication, RBAC, appointment scheduling, consultation management, notifications, expert profiles, ratings, and reviews.
- Designed scalable REST APIs and optimized PostgreSQL databases using Prisma ORM.
- Managed Docker deployment, Linux servers, and production infrastructure.
- Integrated AI-powered expert matching and recommendation features to enhance consultation quality and user experience.

Technologies: NestJS, React, React Native, TypeScript, PostgreSQL, Prisma ORM, Docker, Firebase, Google OAuth.

Technical Director & Partner

FAW GO

2025 – Present

- Technical Director and business partner responsible for technology strategy and engineering leadership.
- Leading the development of a super app for Al-Faw District providing delivery and on-demand services.
- Designed scalable backend architecture and managed full software development lifecycle.
- Supervised the development of 5 applications (3 mobile applications and 2 web platforms).
- Implemented order management, real-time tracking, user management, notifications, and integrated payment architecture.
- Led DevOps, deployment, infrastructure management, and long-term technical planning.
- Designed scalable architecture to support future expansion into additional cities.

Full Stack Developer (AI Learning Platform)

Let's Speak

2025

- Developed an AI-powered learning platform with an intelligent website assistant.
- Designed scalable backend services using NestJS, TypeScript, Prisma ORM, and PostgreSQL.
- Built AI-powered learning workflows and personalized educational experiences.
- Integrated AI chatbots, authentication systems, and secure REST APIs.
- Managed Docker deployments and Linux production servers.
- Optimized backend performance, database scalability, and production reliability.
- Collaborated with frontend and mobile teams to deliver production-ready features.

IT Support & System Administrator

Kuwait Energy – Siba Gas Field

August 2024 – April 2025

- Managed enterprise IT infrastructure, production servers, and networking systems.
- Installed and configured servers, fiber connectivity, and enterprise networking equipment.
- Led technical support operations and coordinated infrastructure maintenance.
- Managed Windows-based systems, hardware, CCTV systems, and enterprise workstations.
- Collaborated closely with the Site IT Manager in planning and technical decision-making.
- Ensured infrastructure availability, performance, and security through preventive maintenance and troubleshooting.

Software Developer

DEVHOUSE

2023 – 2024

Developed commercial software solutions across multiple industries including government, education, hospitality, AI, and e-commerce.

Projects

- CMC Application
- Grand Millennium AI Dashboard
- E-Store Platform
- Almasa.IQ Educational Platform
- FastFood Delivery Platform

Responsibilities

- Developed backend systems using NestJS and Node.js.
- Built web applications with React and mobile applications using React Native.
- Designed REST APIs and integrated third-party services.
- Designed PostgreSQL and MongoDB databases using Prisma and TypeORM.
- Deployed applications using Docker and Linux servers.
- Worked in Agile development teams using Git and GitHub.

IT Intern

Basra Oil Company

2023

- Completed an intensive IT internship with a Very Good evaluation.
- Assisted in server management, enterprise systems, and network infrastructure.
- Supported hardware and software troubleshooting.
- Worked with the infrastructure team to improve operational efficiency.
- Gained practical experience in enterprise IT operations and system administration.

EDUCATION

Bachelor of Computer Science & Information Technology

University of Basra

2020 – 2024

- Graduated with Good grade.
- Ranked among the Top 15 students in the department.

TECHNICAL SKILLS

Languages

TypeScript, JavaScript, SQL, Python, PHP, Go, Java

Backend

NestJS, Node.js, Express.js, REST APIs, Prisma, TypeORM, JWT, OAuth, RBAC, Firebase

Frontend & Mobile

React.js, React Native, Expo, Flutter, Tailwind CSS, Material UI

Databases

PostgreSQL, MongoDB, MySQL, Firestore, DB Design & Optimization

DevOps & Cloud

Docker, Linux, VPS, Nginx, CI/CD, Coolify, Git, GitHub

AI & Tools

OpenAI API, AI Automation, Postman, VS Code, Figma, Odoo, Google Play Console, Search Console, App Store Connect

CERTIFICATIONS

- Odoo ERP Certification

LANGUAGES

- Arabic — Native
- English — Professional Working Proficiency

CERTIFICATE

OF COMPLETION

This certificate is presented to

Hasan Adnan Lateef Al-azzawi

by Odoo Middle East DWC for successfully completing the training

Odoo Project Leader Onboarding Course

26/07/2024

DATE

Abdalla Baker

INSTRUCTOR

Certification n°AE00006086962

GRADUATION CERTIFICATE

This certificate is proudly presented by English peak to:
